First, you will visit the Great Pyramid of Giza (also known as the Pyramid of Khufu or the Pyramid of [Cheops](#)) is the oldest and largest of the pyramids in the Giza pyramid complex. It is the oldest of the Seven Wonders of the Ancient World, and the only one to remain largely intact.

The great pyramid was built as a tomb for the Fourth Dynasty Egyptian pharaoh Khufu and estimate that it was built in the 26th century BC during a period of around 27 years.

Initially standing at 146.5 metres (481 feet), the Great Pyramid was the tallest man-made structure in the world for more than 3,800 years. Throughout history, the majority of the smooth white limestone casing was removed, which lowered the pyramid's height to the present 138.5 metres. What is seen today is the underlying core structure. The base was measured to be about 230.3 metres (755.6 ft) square, giving a volume of roughly 2.6 million cubic metres (92 million cubic feet), which includes an internal hillock

If you wish to visit the burial chamber of King [Cheops](#). You can ask the tour guide to buy it for you it costs 400 I. E per person( 26\$ per person)

Then we will visit the Pyramid of Mykerinus.

Enjoy a camel ride by the [Pyramids of Giza](#) in the desert

Move to visit the Step Pyramid at Sakkara, which is considered the world's oldest major stone structure. It was built in the 3rd Dynasty for King Djoser.

Then Proceed to have your lunch at a local restaurant. After that transfer .Dahshur:

Two of the later pyramids constructed here have been completely destroyed by time, and the elements and several others, such as the Black Pyramid (12th Dynasty, 1929-1885 BC), are badly damaged, but [Dahshur](#) also boasts two of Egypt's best-preserved early pyramids. Both built during the reign of King Sneferu (2613-2589 BC), the founder of the 4th Dynasty, the Bent Pyramid, and the Red Pyramid at [Dahshur](#) are massive evidence of the architectural development that lead to the construction of the Great Pyramid and companions at Giza.
